

```
# -----  
# Custom 404 page  
# -----
```

```
# You can add custom pages to handle 500 or 403 pretty easily, if you like.  
# If you are hosting your site in subdirectory, adjust this accordingly  
# e.g. ErrorDocument 404 /subdir/404.html
```

```
ErrorDocument 404 /index.html
```
